

SAVE EVERY LIFE

IN KEEPING with the Animal Welfare League Qld's goal of achieving zero euthanasia of healthy cats and dogs a new campaign has been developed to help Save Every Life. We have achieved this goal for healthy and sociable dogs on the Gold Coast – but we need the support of the community if we are to do the same with cats.

Save Every Life was developed to enable the AWL to find homes for adult cats found on the Gold Coast. Since launching in May, it has directly saved the lives of ten cats who have now either been adopted from their foster homes, or have been returned to the AWL adoption pens at the Rehoming and Education Centre on Shelter Road, Coombabah as space became available. So if you're looking for a familiar face, and are wondering where they are, check out the pet search facility on the AWL website (www.awlqld.com.au).

Cats in the Save Every Life program are available at a reduced price of \$80 to encourage fast adoption times and ensure emergency foster carers are not left with long-term residents. (It costs the AWL almost \$500 to rehome each animal in our care.) Once they are transferred to the AWL adoption pens they are then available at the normal cost.

Adopt an SEL cat

Anyone interested in adoption should call 5509 9000 to check the cat is still available, and then visit the Rehoming Centre on Shelter Road at Coombabah to complete an adoption interview.

Sponsor SEL

Want to help support the SEL but can't adopt or foster? Become an SEL advertising sponsor and have your name or company logo displayed when SEL is advertised - Call 5509 9033 for more information.

Spread the word about SEL

Adult cats are the perfect companion for many people. With your help, and the support of the community, we can ensure Gold Coast is the first city in Australia to achieve zero euthanasia of healthy and sociable cats and dogs.

The Animal Welfare League of Qld is looking for temporary foster homes for our SEL cats. If you can provide a safe, secure home environment contact the AWL Qld foster coordinator today.
